

What Bruce-Alan's Students Say: **Extremely competent and knowledgeable.**

"Professor B.A.M. is a phenomenal tutor. He has a proficient ability to explain difficult topics in a rudimentary and basic fashion if need be. This enabled me to absorb and understand my complex course material and obtain that "Aha" moment. He has helped me with my computer science course immensely. Without his guidance I don't know where I would be in the class. I was on the verge of dropping the course before I came across professor B.A.M. I plan to continue to retain his services for his invaluable guidance. If there is a better tutor out there, he or she would be hard to find!!"
